Uniprix and *mytrainingweb.com*: improving loss prevention in pharmacies.

With nearly 400 locations throughout Quebec, the Uniprix Group is comprised of pharmacies and has the most retail outlets, including many superstores. These outlets offer a wide range of services, including an extensive selection of pharmaceutical and health products, Beauté boutiques, dermo-cosmetic centres and photo services. Uniprix has chosen to use the online training services of *mytrainingweb.com* to keep its loss-prevention skills up to date.

"The *mytrainingweb.com* web service and the interactive loss-prevention courses that are available there allow us to continually develop our employees' skills. Better loss prevention will help us reduce our operating costs and maintain better customer service," says Marjolaine Plante, CHRP, Human Resources Director.

mytrainingweb.com offers a simple online training solution for the retail sector. These short, 30-minute courses address important retail issues and can be accessed over the Internet from work or home. The first series focuses on loss prevention (preventing internal theft, shoplifting, fraud, etc.).

mytrainingweb.com is a quick and simple web solution that is accessible via Internet Explorer and requires no IT support from clients. Courses are available as soon as they are purchased online.
